### Game Payouts

---

Winnings paid out on the slot machine are dependent on the symbols displayed, once the reels have come to a stop.

All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways. All bet amounts are automatically multiplied by a 50x bet multiplier. So, if you bet 1 coin, you are betting 1 coin x 50 = 50 total coins bet per spin.

- Regular Payouts

All payout figures show the number of coins that are won for each combination. The total number of coins paid out depends on the number of coins you play.

Regular wins are calculated by taking the number of coins won, multiplied by the number of coins bet. For each spin, the bet amount you choose is automatically multiplied by the bet multiplier.

The number of credits won is dependent on the total number of coins won multiplied by the coin size bet.

Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.

If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.

For a combination of regular symbols to produce a winning regular combination, the following criteria must be met:

- Three or more matching symbols must be displayed in any position on consecutive reels.

- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.

### Example

**Game A** has the following criteria:

- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.
- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.
- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Four **Cherry** symbols are displayed on reels 1, 2, 3 and 4. And three **Bell** symbols are displayed on reels 1, 2 and 3.

The **Cherry** symbols complete a 4 **Cherry** symbol combination and pays out 100 coins. So, your payout in coins is 100 coins x 10 coins = 1 000 coins.

The **Bell** symbols complete a 3 **Bell** symbol combination and pays out 15 coins. So, your payout in coins is 15 coins x 10 coins = 150 coins.

Your total payout in coins is 1 000 coins + 150 coins = 1 150 coins. And your total payout in credits is 1 150 coins won x 0.20 coin size = 230 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

- Scatter Symbol Payouts

Scatter wins are calculated by multiplying the scatter symbol combination payout by the total number of regular coins bet.

Scatter wins are added to regular wins. If you have a scatter win and a regular win, you are paid out for both wins, as the scatter symbol does not need to appear on consecutive reels to win.

For a combination of scatter symbols to produce a winning scatter combination, the following criteria must be met:

The **Tattoo Coupon** symbol:

- Completes a winning scatter combination when three or more appear on the reels.
- Cannot be substituted by the wild symbol.

The **Ying Yang Koi Fish** symbol:

- Completes a winning scatter combination when three or more appear on the reels.
- Cannot be substituted by the wild symbol.

### Example

**Game A** has the following criteria:

- Two or more **Scatter Coin** symbols scattered on the reels complete a winning scatter combination.
- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.
- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.
- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.
- Scatter wins are added to regular wins. If you have a scatter win and a regular win, you are paid out for both wins, as the scatter symbol does not need to appear on consecutive reels to win.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Four **Cherry** symbols are displayed on reels 1, 2, 3 and 4. And three **Scatter Coin**

symbols are scattered on the reels.

The **Cherry** symbols complete a 4 **Cherry** symbol combination and pays out 100 coins. So, your payout in coins is 100 coins x 10 coins = 1 000 coins.

The **Scatter Coin** symbols complete a 3 **Scatter Coin** symbol combination and award a 2x multiplier value. So, your payout in coins is 300 total coins bet x 2 = 600 coins.

As scatter wins are added to regular wins, your total payout in coins is 600 coins for the scatter win + 1 000 coins for the regular win = 1 600 coins. And your total payout in credits is 1 600 coins won x 0.20 coin size = 320 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

- Free Spins Bonus Game Payouts

You are awarded twenty free spins. All wins are doubled during the free spins.

All the bets and pay ways played in the free spins are the same as the spin that activated the bonus game.

Free spins can be re-activated during the bonus game.

The Tattoo bonus game cannot be activated during the free spins.

The Free Spins bonus game can activate during the Tattoo bonus game free spins.

If you activate the Free Spins bonus game and the Tattoo bonus game on the same spin, the Tattoo bonus game is played first.

## Example

**Game A** has the following criteria:

- Three or more **Scatter Coin** symbols scattered on the reels, activate the Free Spins bonus game.
- You win three free spins in the bonus game.
- All regular wins are doubled in the bonus game.
- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.
- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each

combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.

- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.
- Scatter wins are added to regular wins. If you have a scatter win and a regular win, you are paid out for both wins, as the scatter symbol does not need to appear on consecutive reels to win.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Three **Bell** symbols are displayed on reels 1, 2 and 3. And three **Scatter Coin** symbols are scattered on the reels.

The **Bell** symbols complete a 3 **Bell** symbol combination and pays out 15 coins. So, your payout in coins is 15 coins x 10 coins = 150 coins.

The **Scatter Coin** symbols complete a 3 **Scatter Coin** symbol combination and award a 2x multiplier value. So, your payout in coins is 300 total coins bet x 2 = 600 coins.

As three **Scatter Coin** symbols activate the bonus game, the Free Spins bonus game begins.

On the first free spin of the bonus game, four **Cherry** symbols are displayed on reels 1, 2, 3 and 4. This completes a 4 **Cherry** symbol combination and pays out 100 coins x 10 coins = 1 000 coins. As all regular wins are doubled during the bonus game, your payout in coins is 1 000 coins x 2 = 2 000 coins for this combination.

On the second free spin, three **Lemon** symbols are displayed on reels 1, 2 and 3. This completes a 3 **Lemon** symbol combination and pays out 80 coins x 10 coins = 800 coins. As all regular wins are doubled during the bonus game, your payout in coins is 800 coins x 2 = 1 600 coins for this combination.

There is no winning combination on the third free spin, so your total bonus game payout is 2 000 coins for the first free spin + 1 600 coins for the second free spin = 3 600 coins.

As scatter and bonus wins are added to regular wins, your total payout in coins is 150 coins for the regular win + 600 coins for the scatter win + 3 600 coins for the bonus game win = 4 350 coins. And your total payout in credits is 4 350 coins won x 0.20 coin size = 870 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

- **Tattoo Bonus Game Payouts**

You choose objects to reveal random bonus win amounts.

The win amounts displayed in the bonus game are already multiplied by your total bet amount. Only the bonus win amount is displayed.

You win the total of all the bonus win amounts revealed.

If three matching tattoos are displayed, you win ten free spins. All wins are doubled during the free spins.

The Tattoo bonus game cannot be activated during the free spins.

The Free Spins bonus game can activate during the Tattoo bonus game free spins.

If you activate the Free Spins bonus game and the Tattoo bonus game on the same spin, the Tattoo bonus game is played first.

### Example

**Game A** has the following criteria:

- Three or more **Bonus** symbols scattered on reels 1, 2 and 3 activate the bonus game.
- There is no payout for any **Bonus** symbol combination.
- You choose objects to reveal random bonus win amounts. Twelve objects are displayed. Behind each object is a random bonus win amount.
- The win amounts displayed in the bonus game are already multiplied by your total bet amount. Only the bonus win amount is displayed.
- The number of symbols that activate the bonus game indicates the number of objects you can choose.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is:

10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Three **Bonus** symbols are displayed on reels 1, 2 and 3.

As three **Bonus** symbols activate the bonus game, the bonus game begins.

Twelve objects are displayed. As three **Bonus** symbols activated the bonus game you can choose three objects.

Object 1 reveals 80 coins, object 2 reveals 20 coins and object 3 reveals 100 coins. So, your payout in coins is 80 coins + 20 coins + 100 coins = 200 coins. And your total payout in credits is 200 coins won x 0.20 coin size = 40 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

## Wild symbol

---

The **Hot Ink Logo** symbol is a wild symbol. This symbol:

- Does not substitute for the scatter symbol.
- Creates its own winning combination when multiple symbols appear on a pay way.

### Example

**Game A** has the following criteria:

- The **Wild Joker** symbol substitutes for other symbols to complete winning combinations.
- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.
- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.
- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Two **Wild Joker** symbols are displayed on reels 1 and 2, and two **Cherry** symbols are displayed on reels 3 and 4. As the **Wild Joker** symbol is wild, this completes a 4 **Cherry** symbol combination.

The **Cherry** symbols complete a 4 **Cherry** symbol combination and pays out 100 coins. So, your payout in coins is 100 coins x 10 coins = 1 000 coins.

The **Wild Joker** symbols complete a 2 **Wild Joker** symbol combination and pays out 10 coins. So, your payout in coins is 10 coins x 10 coins = 100 coins.

Your total payout in coins is 1 000 coins + 100 coins = 1 100 coins. And your total payout

in credits is 1 100 coins won x 0.20 coin size = 220 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

## Scatter symbol

---

Tattoo Coupon	Ying Yang Koi Fish
	

The **Tattoo Coupon** symbol and the **Ying Yang Koi Fish** symbol are scatter symbols.

The **Tattoo Coupon** symbol:

- Completes a winning scatter combination when three or more appear on the reels.
- Cannot be substituted by the wild symbol.
- Three or more **Tattoo Coupon** symbols scattered on the reels, activate the Tattoo bonus game.

The **Ying Yang Koi Fish** symbol:

- Completes a winning scatter combination when three or more appear on the reels.
- Cannot be substituted by the wild symbol.
- Three or more **Ying Yang Koi Fish** symbols scattered on the reels, activate the Free Spins bonus game.

Scatter wins are calculated by multiplying the scatter symbol combination payout by the total number of regular coins bet.

### Example

**Game A** has the following criteria:

- Two or more **Scatter Coin** symbols scattered on the reels complete a winning scatter combination.
- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.

- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.
- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.
- Scatter wins are added to regular wins. If you have a scatter win and a regular win, you are paid out for both wins, as the scatter symbol does not need to appear on consecutive reels to win.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Four **Cherry** symbols are displayed on reels 1, 2, 3 and 4. And three **Scatter Coin** symbols are scattered on the reels.

The **Cherry** symbols complete a 4 **Cherry** symbol combination and pays out 100 coins. So, your payout in coins is 100 coins x 10 coins = 1 000 coins.

The **Scatter Coin** symbols complete a 3 **Scatter Coin** symbol combination and award a 2x multiplier value. So, your payout in coins is 300 total coins bet x 2 = 600 coins.

As scatter wins are added to regular wins, your total payout in coins is 600 coins for the scatter win + 1 000 coins for the regular win = 1 600 coins. And your total payout in credits is 1 600 coins won x 0.20 coin size = 320 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

## Free Spins bonus game

---

Three or more **Ying Yang Koi Fish** symbols scattered on the reels, activate the Free Spins bonus game.

In this game:

- You are awarded twenty free spins.
- All wins are doubled during the free spins.
- All the bets and pay ways played in the free spins are the same as the spin that activated the bonus game.
- Free spins can be re-activated during the bonus game.

- So, if three or more **Ying Yang Koi Fish** symbols are scattered on the reels during the free spins, you are awarded additional free spins. The extra free spins are added to the remaining number of free spins.
- The Tattoo bonus game cannot be activated during the free spins.
- The Free Spins bonus game can activate during the Tattoo bonus game free spins.

If you activate the Free Spins bonus game and the Tattoo bonus game on the same spin, the Tattoo bonus game is played first.

To play the bonus game:

1. The reels automatically start spinning the free spins.
2. The free spins are complete. Your total bonus win amount is counted in the bonus **Win** box.
3. You are automatically returned to the regular slot game.

### Example

**Game A** has the following criteria:

- Three or more **Scatter Coin** symbols scattered on the reels, activate the Free Spins bonus game.
- You win three free spins in the bonus game.
- All regular wins are doubled in the bonus game.
- For a combination of regular symbols to produce a winning regular combination, two or more matching symbols must be displayed in any position on consecutive reels.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- All pay ways are permanently enabled for every spin, so you cannot select or de-select pay ways.
- All bet amounts are automatically multiplied by a 30 bet multiplier.
- Multiple winning combinations are paid out per pay way. If there is more than one winning combination for different symbols on a pay way, you are paid out for each combination. If there is more than one winning combination for the same symbol on a pay way, you are paid out the value of the highest combination only.
- If winning symbol combinations are displayed on multiple pay ways, you are paid out for each combination.
- Scatter wins are added to regular wins. If you have a scatter win and a regular win, you are paid out for both wins, as the scatter symbol does not need to appear on consecutive reels to win.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is: 10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Three **Bell** symbols are displayed on reels 1, 2 and 3. And three **Scatter Coin** symbols are

scattered on the reels.

The **Bell** symbols complete a 3 **Bell** symbol combination and pays out 15 coins. So, your payout in coins is 15 coins x 10 coins = 150 coins.

The **Scatter Coin** symbols complete a 3 **Scatter Coin** symbol combination and award a 2x multiplier value. So, your payout in coins is 300 total coins bet x 2 = 600 coins.

As three **Scatter Coin** symbols activate the bonus game, the Free Spins bonus game begins.

On the first free spin of the bonus game, four **Cherry** symbols are displayed on reels 1, 2, 3 and 4. This completes a 4 **Cherry** symbol combination and pays out 100 coins x 10 coins = 1 000 coins. As all regular wins are doubled during the bonus game, your payout in coins is 1 000 coins x 2 = 2 000 coins for this combination.

On the second free spin, three **Lemon** symbols are displayed on reels 1, 2 and 3. This completes a 3 **Lemon** symbol combination and pays out 80 coins x 10 coins = 800 coins. As all regular wins are doubled during the bonus game, your payout in coins is 800 coins x 2 = 1 600 coins for this combination.

There is no winning combination on the third free spin, so your total bonus game payout is 2 000 coins for the first free spin + 1 600 coins for the second free spin = 3 600 coins.

As scatter and bonus wins are added to regular wins, your total payout in coins is 150 coins for the regular win + 600 coins for the scatter win + 3 600 coins for the bonus game win = 4 350 coins. And your total payout in credits is 4 350 coins won x 0.20 coin size = 870 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

- Three or more **Bonus** symbols scattered on reels 1, 2 and 3 activate the bonus game.
- There is no payout for any **Bonus** symbol combination.
- You choose objects to reveal random bonus win amounts. Twelve objects are displayed. Behind each object is a random bonus win amount.
- The win amounts displayed in the bonus game are already multiplied by your total bet amount. Only the bonus win amount is displayed.
- The number of symbols that activate the bonus game indicates the number of objects you can choose.

You select a 0.20 coin size and bet 10 coins. Your total bet amount is:

10 coins bet x 30 bet multiplier = 300 coins.

You spin the reels.

Three **Bonus** symbols are displayed on reels 1, 2 and 3.

As three **Bonus** symbols activate the bonus game, the bonus game begins.

Twelve objects are displayed. As three **Bonus** symbols activated the bonus game you can choose three objects.

Object 1 reveals 80 coins, object 2 reveals 20 coins and object 3 reveals 100 coins. So, your payout in coins is 80 coins + 20 coins + 100 coins = 200 coins. And your total payout in credits is 200 coins won x 0.20 coin size = 40 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

## Respin Feature

---

The Respin feature enables you to respin a reel, while holding the other reels.

In this feature:

- You can respin a reel at the end of any spin for an additional cost. The cost is calculated in credits.
- The cost of a respin is calculated separately for each reel.
- The cost per respin does not indicate a greater or lesser chance of winning.
- Changing the coin size affects the calculation of the respin cost. So, if you change your coin size after a spin, the Respin feature is disabled until you spin again.
- You can respin a reel multiple times.
- You are only paid out for new winning combinations that are formed as a result of a respin.

The Respin feature is not available during free spins and AutoPlay.

### Example

**Game A** has the following criteria:

- Respin is available at an additional cost in credits.
- The cost of each respin is calculated separately for each reel.
- Regular winning combinations pay out from left-to-right, so one symbol must be displayed on the first slot reel. A symbol combination starting from the second, third, fourth or fifth slot reel does not pay out.
- Only one winning combination is paid out per payline. If there is more than one possible winning combination on a payline, you are paid out the value of the highest combination only.

You select a 0.50 coin size and 10 coins per payline. You then bet on three paylines, so your total bet amount is: 10 coins bet per payline x 3 paylines = 30 coins.

You spin the reels.

Four **Cherry** symbols are displayed on reels 1, 2, 3 and 4 of payline 1.

The **Cherry** symbols complete a 4 **Cherry** symbol combination and pays out 100 coins. So, your payout in coins is 100 coins x 10 coins bet per payline = 1 000 coins.

You respin reel 5 at an additional cost of 0.25 credits.

A **Cherry** symbol is displayed on reel 5 of payline 1. So, five **Cherry** symbols are now displayed on reels 1, 2, 3, 4 and 5 of payline 1.

The **Cherry** symbols complete a 5 **Cherry** symbol combination and pays out 200 coins.

So, your payout in coins is 200 coins x 10 coins bet per payline = 2000 coins.

Your total payout in coins is 1 000 coins for the regular win + 2 000 coins for the respin win = 3 000 coins. And your total payout in credits is 3 000 coins won x 0.50 coin size = 1500 credits.

*The purpose of this example is to help you understand how the payouts work. The actual game, symbols, reels, paylines, cards, betting positions and payouts may be different in the casino you are playing at.*

## Playing the game

---

The objective of the game is to spin the reels so the symbols form a winning combination on the pay way. The payout is dependent on the winning combination formed.

To play:

1. Place a bet. How?

- Click Increase **(+)** or Decrease **(-)** to select the coin size you want to bet.
- Click **Coins** to select the number of coins you want to bet.
- To increase or decrease the number of coins you want to bet, click **Coins (+)** or **(-)**.
- To bet the maximum number of coins permitted, click **Bet Max**. The number of coins bet increases to the maximum and the game automatically starts playing.

2. Click **Spin**. The reels start spinning.

- If you have a winning combination lined up on the pay way, the win is highlighted on the reels. You are paid out the win amount as displayed in the **Win** box.
- If you do not have a winning combination, the game is over and you can play again.
- In some slot games the **Spin** button becomes a **Stop** button. Click **Stop** to display your spin results quicker. This does not influence the results of the spin.

## AutoPlay, Options and Statistics
